Hierarchy Integration Extended Hierar of Phones

Module Summary

## Programming in Modern C++

Module M24: Inheritance: Part 4: Phone Hierarchy

### Partha Pratim Das

Department of Computer Science and Engineering Indian Institute of Technology, Kharagpur

ppd@cse.iitkgp.ac.in

All url's in this module have been accessed in September, 2021 and found to be functional

# Module Recap

#### Objectives & Outlines

• Understood the need and use of protected access specifier

 Discussed the Construction and Destruction process of class hierarchy and related Object Lifetime

# Module Objectives

Module M24

Partha Pratir Das

Objectives & Outlines

ISA Hierarch Design by Inheritance

Helper Classe

Hierarchy o Phones by Interfaces

Interfaces &
State Variables o

Phones

Mobile Phone

Refactoring

Integration
Extended Hierar
of Phones

Module Summar

• Model a hierarchy of phones using inheritance

## Approach to Modeling Hierarchy

Module M2

Partha Pratin Das

Objectives Outlines

ISA Hierarchy Design by Inheritance

Helper Class

Hierarchy of Phones by Interfaces

State Variables of Phones

Landline Phone

Mobile Phone

Refactorir

Hierarchy Integration Extended Hierarc of Phones • Identify the **Concepts and their ISA relationships** to define the hierarchy: model with public inheritance

- Identify and model Helper classes lower level UDTs to define components
- Identify the Interface of each concept: signatures of public member functions
- Identify the **State Variables** of each concept: types of of private / protected data members (also member functions used for ease of implementation)
- **Refactor** common data members and member functions between specialized and generalized classes to link the classes by inheritance
- Integrate the hierarchy with abstract (pure) interface
- Explore extendability
- We illustrate with the phone hierarchy

## Helper Classes

Module Summar

## **Helper Classes**

## Helper Classes

#### Helper Classes

Class Description

class PhoneNumber 12-digit phone number

Subscriber Name (as string) class Name

Image & Subscriber Name as alt text class Photo

class RingTone Audio & ring tone name

PhoneNumber, Name, and Photo (optional) of a contact class Contact

List of contacts class AddressBook

Programming in Modern C++ M24.8 Partha Pratim Das

## Hierarchy of Phones by Interfaces

Hierarchy of Phones by Interfaces

**Hierarchy of Phones by Interfaces** 

## Hierarchy of Phones

Hierarchy of Phones by Interfaces

- MobilePhone ISA LandlinePhone
  - o LandlinePhone is generalization
  - o MobilePhone is specialization
  - MobilePhone inherits the properties of LandlinePhone
- SmartPhone ISA MobilePhone
  - MobilePhone is generalization
  - SmartPhone is specialization
  - SmartPhone inherits the properties of MobilePhone
- ISA is transitive

### Interfaces of Phones

Hierarchy of Phones by Interfaces

Landline Phone

o Call: By dial / keyboard

Answer

Caller ID (with special attached device)

Mobile Phone

Call: By keyboard – shows number

▷ Bv Number

▷ By Name

Answer

Caller ID

Redial

Set Ring Tone

Add Contact

Number

Name

Smart Phone

○ Call: By touchscreen – shows number & photo

▷ By Number

▷ By Name

Answer

Caller ID

Redial

Set Ring Tone Add Contact

Number

Name

Photo

• There exists a substantial overlap between the functionalities of the phones

• A mobile phone is more capable than a land line phone and can perform (almost) all its functions

• A smart phone is more capable than a mobile phone and can perform (almost) all its functions

These phones belong to a Specialization / Generalization Hierarchy

### Interfaces & State Variables of Phones

Module M24
